Attached are suggested edits to the current History/Social Science Framework draft. I am sending these on the advice of the CDE and the IQC who stated that it would be helpful to make specific suggestions as opposed to simply saying that the Economics had to be strengthened and Personal Finance should be included. The emphasis on Cost/Benefit analysis and human capital is a reflection of the emphasis on those two topics in the C3 document.

I have tried to integrate personal finance into the Framework and have done so wherever it seems appropriate.

In terms of length, these suggested additions clearly lengthen an already lengthy document. I have tried to be as brief as possible while including what would appear to most economists to be essential information for students.

Richard Myles Johnson Foundation, as well as the California & Nevada Credit Union Leagues

Thanks for your help.

Best,

Jim
